

Nagase reduced **40% time**
in auditing using the Navision
DMS

KEY RESULTS

Transformation

from Physical to
Digital Engineering

99%

Paperless Environment

Optimize

Auditing process and
expedite Bill cycle

ABOUT NAGASE INDIA

NAGASE has had its presence in India for over 50 years, started as a Liaison office and now a Private Limited Company catering to customers' needs. NAGASE India services provide a single platform for all procurement requirements which can be sourced from domestic and international markets.

With a large global network, it bridges the gap between local producers and reputed overseas customers.

NAGASE India is recognized as Business Designers providing a wide range of customized solutions in industries like Plastics, Automobiles, Paints, Speciality Chemicals, Pharmaceuticals, Food and Cosmetic Ingredients.

WHAT CALLED FOR THE TRANSFORMATION ?

In their digital road map journey, Nagase's India 1st need was to be able to:

- 1 Build a **paperless work environment**.
- 2 **Access data easily** from anywhere anytime.
- 3 Digitize the approval process and **reduce redundancy**.

THE CHALLENGE

The invoices and related documents for Purchase, Sales & Expenses were kept physically in folders with vouchers stapled.

Auditing transactions against supporting documents sometimes would lead to around 50 folders per transaction in a day.

Searching for documents was a tedious task due to manual interventions.

During Covid times these manual interventions also posed safety issues.

OUR APPROACH: ADDING VALUE

The above challenge could be well dealt with a streamlined DOCUMENT MANAGEMENT SYSTEM.

DMS Created on Microsoft Navision

Navigation between process documents became Easy.

99% paperless environment to its users helping in easy of storage and less of data loss due to misplacement

Auditing on the digital document saved **40% time.**

Inventory	Inventory Item	Qty Manager	Unit Measure	Unit Cost	Value	How Allocated	Price Type
